FOR IMMEDIATE RELEASE

**LightWorks Optics, Inc. Receives ISO Registration
For High-Volume Production Division**

Tustin, CA – August 16, 2011 – LightWorks Optics, Inc. the leading provider of precision optical assemblies, systems and components, is pleased to announce that the company's 10,000 square-foot High-Volume Production (HVP) division located in Vista, CA, has received ISO 9001:2008 registration.

While the HVP division has consistently provided ISO-compliant services under LightWorks Optic's general ISO 9001:2008 registration over the last three years, the facility's new registration status now provides for a third-party audit of the HVP division's methods for continuous improvement, process control and quality system management.

"Our day-to-day operations and production practices will essentially remain the same," stated Aaron Jones, HVP's Operations Manager. "However, the registration now opens up the opportunity to reach new markets and customers that require consistent and controlled processes and quality standards."

LightWorks Optic's executive management team is pleased with the new status and states that the registration represents ongoing efforts to fully integrate the company's precision optical design and engineering expertise with their state-of-the-art HVP capabilities under one quality system umbrella.

Michael Minailo, LightWorks Optic's Chief Executive Officer and President asserts, "Having the HVP division be audited by a third-party and included in a cycle of internal audits is an important step, because it provides our defense, aerospace, medical device and commercial customers the confidence that our system of improvement and quality is, and will continue to be, our number one priority."

For more information about LightWorks Optics, Inc., please call 714-247-7175, or visit the new website at www.lightworksoptics.com.

About LightWorks Optics, Inc.

Founded in 1997, LightWorks Optics, Inc. is the leading provider of precision optical assemblies, systems and components. The company's award-winning design, engineering and production capabilities are meeting the complex optical needs of customers in the biomedical, medical device, aerospace, defense and commercial industries. The photonic applications may be diverse, but all LightWorks Optics products share a common focus on rapid development, excellent value, and high performance. The company is employee-owned and ISO 9001:2008 certified.
